

Humanities and Languages Department

Year 9 Geography

Subject Description

Geography gives students the opportunity to study the two things most central to our existence – the plight of the human species (with all its successes and failures), and the environment which sustains us. In this course, students will see how every human decision impacts affects the natural world. They will also see how the natural world both limits and provides opportunity for us to thrive as a species. Geography is about creating a future that we want for ourselves.

Weekly workload in hours: 1+ hours

COURSE DURATION

1 Year

SUBJECT TYPE

Elective
