

Humanities and Languages Department

Year 9 Italian

Subject Description

Learning a second language can open up a life that our students may have never imagined for themselves, from international travel, appreciating art and culture, unique job opportunities, and better understanding the world's cultures. The Italian language has a rich and proud history, and shares close ties to other European languages such as Spanish and French. Learning Italian not only opens up the incredible culture of Italy but it provides students with the skills to communicate in an increasingly global 21st century society.

Weekly workload in hours: 1+ hours

COURSE DURATION

1 Year
